

Experienced Hydrographic Surveyors

EGS Australia Pty Ltd are searching for experienced senior survey engineers to join the team. The successful candidate will be involved with both site and office work working on projects globally in both the inshore and offshore environment. The Survey Engineer is primarily responsible for the installation, operation and maintenance of survey equipment on survey vessels. As an experienced survey engineer, you will be involved with all aspects of a project to include; survey planning, vessel mobilisation, equipment calibration/verification, survey acquisition, and final reporting. Working in small survey teams on complex projects, survey engineer will be involved in installation, set up and maintenance of the survey and geophysical equipment (side scan sonar, sub-bottom profiler, magnetometer, multi-channel seismics, CPT, Vibrocore and grab sampling) and to assist in troubleshooting of any equipment related issues.

Responsibilities and Accountabilities:

- A commitment to safe work practices and is willing to embrace the EGS Survey Management System and policies.
- The installation, operation and maintenance of survey equipment which includes standard PCs and peripheral, GPS positioning equipment, acoustic positioning systems and sonar sensors such as side scan and multibeam echo sounders, geophysical & seismic data acquisition systems.
- Survey engineers can also be involved in the positioning and data acquisition activities of a survey project.
- Projects will vary between simple side scan sonar investigation surveys through to complex platform site investigation and interrogation surveys.
- During an Incident or Near Miss:
 - Rectify Hazards (if safe and possible to do so).
 - Administer First Aid (if applicable).
 - Inform Party Chief/Senior Site Representative/Manager.
 - Be able to take part in the incident investigation.

Practical Skills:

- Sound experience in geophysical surveys in support of the offshore oil and gas industry.
- Demonstrate competence developing and maintaining sound co-worker relationships.
- Excellent oral and written communication skills.

Minimum Qualifications:

- University graduate.
- Appropriate military or industrial training & experience is also acceptable
- Willing to relocate to EGS office in Perth, WA
- Site work rotations can be as short as a few days but also up to 6 weeks, therefore the ability to work away from home for long periods is essential.
- Self-motivated, with the ability to work well under pressure in a team environment.
- Current medical, BOSIET/FOET certificates are an advantage.
- Eligible to work in Australia and possess a full Australian driving licence.
